QUALIFIED MANUFACTURERS LIST

OF

PRODUCTS QUALIFIED UNDER PERFORMANCE SPECIFICATION

MIL-PRF-19500

SEMICONDUCTOR DEVICES

GENERAL SPECIFICATION FOR

This list has been prepared for use by or for the Government in the acquisition of products covered by Specification MIL-PRF-19500. Listing of a product is not intended to and does not connote endorsement of the product by the Department of Defense. All products listed herein have been qualified under the requirements for the product as specified in the latest effective issue of the applicable specification. This list is subject to change without notice; revision or amendment of this list will be issued as necessary. The listing of a product does not release the supplier from compliance with the specification requirements.

THE ACTIVITY RESPONSIBLE FOR THIS QML IS THE DEFENSE SUPPLY CENTER COLUMBUS (DSCC-VQ), COLUMBUS, OH 43216-5000.

This QML is divided into three sections. Section I is an alphabetical listing of the manufacturers certified to MIL-PRF-19500 and the manufacturers eligible to supply products under the Diminishing Manufacturing Source Approval provisions (denoted as "DMS Approval") per the requirements of MIL-PRF-19500. Section II lists all parts qualified by the certified manufacturers. Section III lists all parts qualified by DMS manufacturers.

The listing of discrete semiconductors in QML-19500 applies only to products produced on the MIL-PRF-19500 certified line(s) at the plant(s) specified in Section I of the QML. The number in parenthesis next to some manufacturers' listings correlates to the plant(s) listed in Section I. Therefore, only those products that have been fabricated, assembled, and tested on the certified/qualified lines herein can be supplied as qualified QML-19500 products. Section I of the QML also indicates the certification status for each manufacturer. The two certification options are either to the Quality Management Program outlined in appendix C or the Quality Program of appendix D. In addition to the two options for certification there are two levels of certification; JAN, JANTX, JANTXV certification and JANS certification. Manufacturers in the process of making the transition from their previously certified QPL appendix D certification to an appendix C certification may be granted a transitional certification to appendix C in accordance with the requirements of MIL-PRF-19500. Manufacturers not able to comply with the certification requirements of either appendix C or D may be granted a DMS approval. DMS approvals are intended to provide a qualified source of supply for difficult procurement situations.

MIL-PRF-19500 contains provisions for test optimization for all listed processes and products for all device classes. Under these provisions traditional screens and Conformance Inspections (CI) can be optimized if found to be non-value added through the manufacturers up front controls and monitors in the wafer fabrication, assembly, and test areas as well as by design. Optimization of these screens and inspections in no way adversely affects the devices' military form, fit, and function. Regardless of screening or CI testing optimization, the manufacturer is still responsible for supplying products capable of passing any screening or CI tests prescribed in MIL-PRF-19500 and in the performance specification sheet.
