Notes:

1. Style: The style is identified by the two-letter symbol "PC" followed by a two-digit number; the letters identify tubular-trimmer, piston-type, variable capacitors, and the number identifies the shape or differentiating electrical characteristics of the capacitor.

2. Characteristic: The characteristic is identified by a single letter in accordance with table I of MIL-PRF-14409.

3. Capacitance: The nominal maximum rated capacitance value expressed in picofarads (pF) is identified by a three-digit number; the first two digits represent significant figures and the last digit specifies the number of zeros to follow. When fractional values are required, the letter "R" should be used to indicate the decimal point. For example: 8R5 indicates 8.5 pF.
