Recommend cancellation of these documents due to lack of procurement and demand. Documents are 15+ years old. The specification contains a requirement for qualification; however, no products or sources have ever been established. There has been no procurement of or demand for these items. There are no NSNs. There is no QPL and no interest in qualification.

Concurrence or comments are required at this Center no later than 45 days from the date of this letter. Late comments will be held for the next coordination of the document. Comments from military departments must be identified as either "Essential" or "Suggested". Essential comments must be justified with supporting data. Military review activities should forward comments to their custodians or this office, as applicable, in sufficient time to allow for consolidating the department reply. Lack of response will be construed as concurrence with or no interest in this draft.
