PMIC N/A	PREPARED BY Randy Larson	DESIGN ACTIVITY DEFENSE ELECTRONICS SUPPLY CENTER, DAYTON, OH	
Original date of drawing 11 Sep 84	CHECKED BY David E. Moore	TITLE FILTERS AND CAPACITORS, RADIO FREQUENCY/ ELECTROMAGNETIC INTERFERENCE SUPPRESSION, HERMETICALLY SEALED ON ONE END ONLY	
	APPROVED BY Randy Larson		
	SIZE A	CODE IDENT. NO. 14933	DWG NO. 84080
	REV	F	PAGE 1 OF 7

1. SCOPE

1.1 Scope. This drawing and [MIL-PRF-28861](#) describe the requirements for radio frequency interference filters and capacitors.

1.2 Part or Identifying Number (PIN). The complete PIN shall be as follows:

84080	-	XXX
-----		-----
Drawing		Dash
number		number
		(see table I)

2. APPLICABLE DOCUMENTS

2.1 General. The documents listed in this section are specified in sections 3 and 4 of this drawing. This section does not include documents cited in other sections of this drawing or recommended for additional information or as examples. While every effort has been made to ensure the completeness of this list, document users are cautioned that they must meet all specified requirements of documents in sections 3 and 4 of this drawing, whether or not they are listed here.

2.2 Government documents.

2.2.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those cited in the solicitation or contract (see [6.2](#)).

DEPARTMENT OF DEFENSE SPECIFICATIONS

[MIL-PRF-28861](#) - Filters and Capacitors, Radio Frequency/Electromagnetic Interference Suppression, General Specification for.

DEPARTMENT OF DEFENSE STANDARDS

[MIL-STD-220](#) - Method of Insertion Loss Measurement.
[MIL-STD-1285](#) - Marking of Electrical and Electronic Parts.

(Copies of these documents are available online at <http://quicksearch.dla.mil/>.)

2.3 Order of precedence. Unless otherwise noted herein or in the contract, in the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

3. REQUIREMENTS

3.1 Interface and physical dimensions. The interface and physical dimensions shall be as specified in [MIL-PRF-28861](#) and herein.

3.1.1 Terminals. Terminals shall be solderable and in accordance with [figure 1](#) herein.

3.1.2 Case dimensions. The case dimensions shall be in accordance with [figure 1](#) herein.

3.1.3 Finish. The case and lead finish shall be gold plated as specified in [MIL-PRF-28861](#).

3.1.4 Pure tin prohibition. Pure tin shall be prohibited as specified in [MIL-PRF-28861](#) (see [6.4](#)).

3.1.5 Weight. The weight shall be as follows:

For C circuit parts - .25 gram, maximum.
For L circuit parts - .75 gram, maximum.

DEFENSE ELECTRONICS SUPPLY CENTER, DAYTON, OHIO	SIZE A	CODE IDENT NO. 14933	DWG NO. 84080
		REV F	PAGE 2

3.2 Operating temperature range. The operating temperature range shall be -55°C to +150°C.

3.3 Temperature rise. The temperature rise shall be +35°C maximum.

3.4 Electrical characteristics.

3.4.1 Rated voltage. The rated voltage shall be in accordance with [table I](#).

3.4.2 Rated current. The rated current shall be 15 amperes maximum.

3.4.3 Rated frequency. The rated frequency shall be dc to 400 Hz.

3.4.4 Capacitance. Capacitance shall be in accordance with [table I](#).

3.4.5 Voltage and temperature limits of capacitance. Voltage and temperature limits of capacitance shall be +15, -40 percent.

3.4.6 Insulation resistance. Insulation resistance shall be as follows:

At +25°C: 1,000 megohm-microfarads or 100,000 megohms minimum, whichever is less.

At +125°C: 100 megohm-microfarads or 10,000 megohms minimum, whichever is less.

3.4.7 Insertion loss. Insertion loss shall be as follows:

At +25°C: In accordance with [table I](#).

At -55°C and +150°C: A 3 dB degradation from the +25°C value shall be allowed.

3.4.8 Voltage drop. Voltage drop shall be .15 V dc for dc rated parts and .234 V ac for ac rated parts.

3.4.9 DC resistance. DC resistance shall be 0.01 ohm, maximum.

3.5 Environmental and mechanical requirements. The environmental and mechanical requirements shall be in accordance with [MIL-PRF-28861](#) for class B, non-hermetically sealed filters. The following details and exceptions shall apply.

3.5.1 Solderability of terminals. Solderability of terminals shall be in accordance with [MIL-PRF-28861](#), except temperature of solder shall be +300°C ± 5°C.

3.5.2 Resistance to soldering heat. Resistance to soldering heat shall be in accordance with [MIL-PRF-28861](#), except temperature of solder shall be +300°C ± 5°C.

3.5.3 Solderability of mounting termination. Solderability of mounting termination shall be in accordance with [MIL-PRF-28861](#), except temperature of solder shall be +300°C ± 5°C.

3.6 Product assurance level. Class B only.

3.7 Marking. Filters and capacitors shall not be marked. The unit package shall be marked in accordance with [MIL-STD-1285](#), except the part number shall be as specified in [1.2](#) with the manufacturer's name or code, date code, voltage rating, and current rating.

3.8 Manufacturer eligibility. To be eligible for listing as an approved source of supply, a manufacturer shall be listed on the [MIL-PRF-28861 Qualified Products List](#) for at least one part or, perform first article inspection in accordance with the [MIL-PRF-28861](#) qualification inspection requirements for class B.

DEFENSE ELECTRONICS SUPPLY CENTER, DAYTON, OHIO	SIZE A	CODE IDENT NO. 14933	DWG NO. 84080

NOTES:

1. Dimensions are in inches.
2. Metric equivalents are given for general information only.
3. Unless otherwise specified, tolerance is $\pm .005$.
4. Circuit diagram is for information only.
5. Filters shall be supplied with 60/40 solder preform.
6. Potting on nonhermetically sealed end shall not extend beyond .030 inch from the filter body.
7. Filters shall be installed using the recommended installation methods in 6.6.1.3 (solder-in style paragraph) of [MIL-PRF-28861](#).

1/ For C circuits, insertion loss measurements shall be made under no load. For L circuits, insertion loss measurements shall be made under full load over the frequency range of 1 MHz to 10 MHz. Insertion loss measurements above and below this frequency range shall be made under no load.

2/ The insertion loss requirements between any two adjacent frequencies shall be that of the lower of the two frequencies in order to accommodate resonant dips.

3.9 Recycled, recovered, environmentally preferable, or biobased materials. Recycled, recovered, environmentally preferable, or biobased materials should be used to the maximum extent possible provided that the material meets or exceeds the operational and maintenance requirements, and promotes economically advantageous life cycle costs.

3.10 Workmanship. Filters and capacitors shall be processed in such a manner as to be uniform in quality and shall be free from cold soldering, corrosion, pits, dents, cracks, rough sharp edges, misalignments, and other defects that will affect life, serviceability, or appearance. Cracks in glass seals are not allowed, however, minor meniscus crazing is acceptable.

4. VERIFICATION

4.1 Qualification inspection. Qualification inspection is not required.

4.2 Conformance inspection.

4.2.1 Inspection of product for delivery. Inspection of product for delivery shall consist of groups A and B inspections of MIL-PRF-28861 for class B.

4.2.2 Certification. The acquiring activity, at its discretion, may accept a certification of compliance with group B requirements in lieu of performing group B tests (see 6.2c).

5. PACKAGING

5.1 Packaging requirements. For acquisition purposes, the packaging requirements shall be as specified in the contract or order (see 6.2). When actual packaging of materiel is to be performed by DoD or in-house contractor personnel, these personnel need to contact the responsible packaging activity to ascertain requisite packaging requirements. Packaging requirements are maintained by the Inventory Control Point's packaging activity within the Military Department or Defense Agency, or within the military services' systems commands. Packaging data retrieval is available from the managing Military Department's or Defense Agency's automated packaging files, CD-ROM products, or by contacting the responsible packaging activity.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. Filters conforming to this drawing are intended for use when military specifications do not exist and qualified military devices that will perform the required function are not available for OEM application. This drawing is intended exclusively to prevent the proliferation of unnecessary duplicate specifications, drawings, and stock catalog listings. When a military specification exists and the product covered by this drawing has been qualified for listing on QPL-28861, this drawing becomes obsolete and will not be used for new design. The QPL-28861 product shall be the preferred item for all applications.

6.2 Acquisition data. The acquisition document should specify the following:

- a. Complete PIN (see 1.2).
- b. Requirements for delivery of one copy of the conformance inspection data with each shipment of parts by the manufacturer.
- c. Whether the manufacturer performs the group B tests or provides certification of compliance with group B requirements.
- d. Requirements for notification of change of product to acquiring activity, if applicable.
- e. Requirements for packaging and packing.

6.3 Soldering temperature. Caution: These devices should not be exposed to soldering temperatures exceeding 300°C. Exposure time to soldering temperature of 300°C should not exceed one minute.

6.4 Pure tin prohibition. Pure tin is prohibited since it may result in tin whisker growth. The use of alloys with tin content greater than 97 percent may exhibit tin whisker growth problems after manufacture. Tin whiskers may occur anytime from a day to years after manufacture and can develop under typical operating conditions on products that use such materials. Conformal coatings applied over top of a whisker-prone surface will not prevent the formation of tin whiskers. Alloys of 3 percent lead, by mass, have shown to inhibit the growth of tin whiskers. For additional information on this matter, refer to [ASTM-B545](#) (Standard Specification for Electrodeposited Coating of Tin).

6.5 Changes from previous issue. The margins of this specification are marked with vertical lines to indicate where changes from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous issue.

6.6 Users of record. Coordination of this document for future revisions is coordinated only with the approved source(s) of supply and the users of record of this document. Requests to be added as a recorded user of this drawing may be achieved online at capacitorfilter@dla.mil or if in writing to: DLA Land and Maritime, ATTN: VAT, Post Office Box 3990, Columbus, OH 43218-3990 or by telephone (614) 692-0551 or DSN 850-0551.

6.7 Replaceability. Filters covered by this drawing will replace the same commercial device covered by contractor-prepared specification or drawing.

6.8 Approved sources of supply. Approved source(s) of supply are listed herein. Additional sources will be added as they become available. Assistance in the use of this drawing may be obtained online at capacitorfilter@dla.mil, or by contacting DLA Land and Maritime, ATTN: VAT, Post Office Box 3990, Columbus, OH 43218-3990 or by telephone (614) 692-0551 or DSN 850-0551.
