This list has been prepared for use by or for the Government in the acquisition of products covered by Specification MIL-PRF-38534. Listing of a product is not intended to, and does not connote endorsement of the product by the Department of Defense. This list is subject to change without notice; revision or amendment of this list will be issued as necessary. The listing of a product, process, or material does not, in any way, release the supplier from the responsibility to comply with the individual item specification requirements.

THE DEFENSE SUPPLY CENTER COLUMBUS (DSCC-V) IS THE PREPARING ACTIVITY (PA) FOR MIL-PRF-38534, AND IS THEREFOR RESPONSIBLE QUALIFICATION. DSCC-VQ IS THE ORGANIZATIONAL ELEMENT, WITHIN THE PA, WHICH PERFORMS THE ADMINISTRATIVE AND TECHNICAL FUN NECESSARY FOR QUALIFICATION OF PRODUCTS, PROCESSES AND MATERIAL. Mailing Address: Defense Supply Center Columbus (DSCC-VQ), P.O Box 3990, Columbus, Ohio 43216-5000.

In order for a manufacturer to ha st data considered for qualification, the manufacturer must perform all required qualification tests; produce the qualification sample under a valid authorization to test with DSCC certified materials and manufacturing construction techniques; and comply with the requirements specified in MIL-PRF-38534.

The listing of custom hybrid microcircuit materials and manufacturing construction techniques in QML-38534 applies only to products produced on the MIL-PRF-38534 certified line(s) at the plant(s) specified on the QML.

Custom hybrid microcircuits manufactured, assembled, and tested in accordance with MIL-PRF-38534 shall bear the "certification mark" for SMD controlled hybrid Microcircuits, or the "compliant hybrid" certification mark for non-SMD controlled hybrid microcircuits as follows:

SMD product, for all classes, shall have the certification mark "QML" or "Q" for small devices.
Non-SMD product dated after MIL-PRF-38534D, for Class K shall have the certification mark "CK."
Non-SMD product dated after MIL-PRF-38534D, for Class H shall have the certification mark "CH."
Non-SMD product dated after MIL-PRF-38534D, for Class G shall have the certification mark "CG."
Non-SMD product dated after MIL-PRF-38534D, for Class E shall have the certification mark "CE."
Non-SMD product dated after MIL-PRF-38534D, for Class D shall have the certification mark "CD."
Non-SMD dated prior to MIL-PRF-38534D, for all classes, shall have the certification mark "CH" or "C" for small devices.

These certification marks or the abbreviations "Q" or "C" shall not be used, on product that does not meet all requirements of MIL-PRF-38534 except as allowed in 3.7.5 of MIL-PRF-38534.

Products manufactured, assembled, and tested for Class K, Class H, Class G, Class E, or Class D, with all the provisions of MIL-PRF-38534, and with DSCC qualified materials and manufacturing construction techniques, can be represented as being compliant to the appropriate product assurance levels as listed herein.

The information contained in this QML reflects the general material and manufacturing techniques of the particular test sample(s). In order to protect the manufacturers' proprietary processes and materials, only the generic process and material are listed. The user must contact the manufacturer for any detail information on specific materials (i.e., such as epoxy, getter, solder-type), or process details. Processes and materials, not listed, may be considered qualified by similarity to those demonstrated for the qualification (e.g., different wire, package, or die sizes). See Appendix D of MIL-PRF-38534, Class l, major changes paragraph, for a baseline of qualification limits.

Any product, represented as being compliant to MIL-PRF-38534, must be built using qualified processes and materials. The user shall be responsible for determining if the qualification baseline for a given class level is adequate to demonstrate capability for the intended application.

To obtain MIL-PRF-38534 qualified hybrid microcircuits, the user should specify in the procurement document that the product be manufactured to MIL-PRF-38534, and be comprised of materials and manufacturing construction techniques listed herein. Acquisition requirements are contained in paragraph 6.2 of MIL-PRF-38534. Microcircuit devices represented as being built, tested and shipped under the QML provision of MIL-PRF-38534, must be built using qualified manufacturing materials and construction listed in this QML.

Contractor acquiring activities, military program offices, and other government representatives can determine if hybrid microcircuits meet the requirements of MIL-PRF-38534 by:
a. For SMD controlled product: Product listed in the product eligibility section herein and marked with "QML" or "Q".

b. For non-SMD controlled Product: The part will not be listed on the QML. However, the part will be marked with "C" plus the Class Level designator".

Warning! If products were not purchased to, and identified as MIL-PRF-38534 QML, do not assume they have been manufactured on the DSCC certified line, with qualified materials and processes, or that all other MIL-PRF-38534 requirements were performed.

To determine whether new SMD controlled products are in accordance with MIL-PRF-38534, or to verify any new process/material qualifications, you may call the qualifying activity (DSCC-VQ).

Only DSCC-VQ ISO Registrations are listed herein. Therefore, QML listed manufacturers may have ISO registrations from other registrars.

This Qualified Manufacturers List (QML) is available from the DSCC-VQ World Wide Web pages.

Notes:

1/ The QML listing can be expanded provided appropriate qualification testing is performed and passed. Therefore the manufacturer may accept an order for compliant product not covered by his QML listing, but shall not ship the compliant product until the testing has been successfully completed.

2/ Package seal perimeter is listed by largest perimeter successfully tested in inches.

3/ Package lead counts are listed by maximum number of leads covered by qualification.

4/ Caution. Do not use this number for item acquisition. Item acquired to this number may not satisfy the performance requirements of the listed SMD.

5/ Inactive for new design, no longer available from manufacturer.

6/ Class E devices are devices, which meet all of the requirements of one of the other classes (K, H, or G), with some exceptions taken. Therefore any manufacturer qualified to G, H or K is eligible to produce and mark product as compliant to class E.

Substrate Attach: Solder, Nonconductive Epoxy
Element Attach: Conductive Epoxy, Nonconductive Epoxy, Solder, Eutectic
Add-on Elements: Unpackaged Die, Chip Capacitors, Tantalum Capacitors, Tabs, Chip Resistors, Inductors, Toroids
Wire Bonding: Gold, Aluminum, Copper

Package Information: See Notes 1/ 2/ 3/

Package Information: Metal Package, Axial Leads, Projection Weld, 4.26 Seal Perimeter, 8 Leads, Gold/Solder Lead Finish; Metal Package, Peripheral Leads, Seam Weld, 4.00 Seal Perimeter, 32 Leads, Gold/Solder Lead Finish; Metal Package, Peripheral Leads, Seam Weld, 8.00 Seal Perimeter, 12 Leads, Gold/Solder Lead Finish; Metal Package, Axial Leads, Seam Weld, 6.40 Seal Perimeter, 5 Leads, Gold Lead Finish; Metal Package, Axial Leads, Seam Weld, 6.00 Seal Perimeter, 38 Leads, Gold/Solder Lead Finish
