QUALIFIED MANUFACTURERS LIST

OF

ADVANCED MICROCIRCUITS

QUALIFIED UNDER MILITARY SPECIFICATION

MIL-PRF-38535

MICROCIRCUITS MANUFACTURING

GENERAL REQUIREMENTS FOR

QML-38535-16
16-Oct-2002
SUPERSEDING
QML-38535-15
13-Feb-2002

TABLE OF CONTENTS

This list has been prepared for use by or for the Government in the acquisition of advanced microcircuit products covered by Specifications MIL-PRF-38535 and MIL-M-38510. Listing of a product is not intended to and does not connote endorsement of the product by the Department of Defense. This list is subject to change without notice; revision or amendment of this list will be issued as necessary. The listing of a product does not in any way release the supplier from compliance with the individual item specification requirements.

THE ACTIVITY RESPONSIBLE FOR THIS QML is the Defense Supply Center Columbus (DSCC-VQ), Columbus, OH 43216-5000.

If a manufacturer desires to have test data considered for qualification, he must be certified and perform all required qualification tests; the qualification sample must be produced under a valid authorization to test with DSCC certified materials and manufacturing techniques; and he must comply with the requirements specified in MIL-PRF-38535 prior to the start of any testing.

The listing of microcircuit manufacturing lines in the QML applies only to products produced in the plant(s)specified herein. Therefore, only those products that have been manufactured, assembled, and tested on the certified/qualified lines herein, can be supplied as qualified microcircuit QML devices.

Microcircuits manufactured, assembled, and tested in accordance with MIL-PRF-38535 shall bear the "QML" certification mark or the "Q" abbreviation. Products manufactured, assembled, and tested shall meet all the provisions of MIL-PRF-38535; and shall be manufactured on the DSCC certified lines as indicated herein. The information contained in this QML reflects the actual manufacturing lines, materials, and manufacturing construction techniques of the particular test sample(s). Any product represented as being compliant shall be manufactured on the lines/flows using the material and manufacturing construction techniques listed herein, as is necessary to meet the requirements of the user. The user shall be responsible for determining if the QML listing is adequate to demonstrate capability for the intended application.

This Qualified Manufacturers List (QML) is available from the DSCC-VQ World Wide Web pages. The web pages are accessed at the address http://www.dscc.dla.mil/offices/sourcing_and_qualification/, and specifically:

a. http://www.dscc.dla.mil/programs/qmlqpl/QPLdetail.asp?QPL=38535: QML-38535 details including links to Adobe Acrobat PDF copies of the this revision and historical revisions.

b. http://www.dscc.dla.mil/programs/psearch/: QML/QPL Part Number Search Engine. This utility allows direct querying of qualified hybrid product information on the Web, with subsequent linking to manufacturer QML program status information (available separately at http://www.dscc.dla.mil/programs/psearch/Location.asp?mode=CompanyList&QMLQPLNUM=38535).

c. http://www.dscc.dla.mil/Programs/Smcr/: Standard Microcircuit Cross-Reference.

PREFACE

Transitional Certification is defined as an allowance granted to JAN MIL-M-38510 manufacturers and eligible M-level 883 compliant suppliers to transition their QPL, SMD and MIL-STD-883 compliant devices to the QML MIL-PRF-38535 program. This allowance is based on information provided by the JAN manufacturers that the included facilities and product have been and are meeting screening method 5004 and Quality Conformance Inspection method 5005. To be eligible for transitional certification, the JAN manufacturer must have submitted a plan for achieving full MIL-PRF-38535 QML within a specified period of time.

QML is a definition of a manufacturer's technology capabilities. This means that devices may be available under QML even though not listed. The user is encouraged to contact the manufacturer or DSCC to make arrangements for part availability under QML.

MIL-PRF-38535 contains provisions for test optimization for all listed processes and products including all device classes. Under these provisions, traditional military screens and inspections can be optimized if found to be non-value added through the manufacturers up front controls and monitors as well as design, wafer fabrication, assembly and test design areas. Optimization of these screens and inspections in no way adversely affects the devices military form, fit and function application, rather the device shall be considered more robust since these screens and inspection are no longer value added. Regardless of screening or QCI testing optimization, the manufacturer is still responsible to supply products capable of passing any screening test optimization or QCI tests prescribed in MIL-PRF-38535 and in the device procurement specification. A QML test optimization information base is available in. For more details the customer should contact either the device manufacturer or the DSCC company contact.

QML-38535 Document Table of Contents

Title Page

Preface

Disclaimers about plastic packaging from Texas Instruments

Notes on ESD designations

Section I: Qualified Manufacturers List (QML). Manufacturers (full and transitional) meeting MIL-PRF-38535 requirements.

Table I: Master cross reference listing of approved QML sources by SMD and Military Specification to manufacturer's part number.

Table II: Master cross reference listing of manufacturer generic part number to the approved QML source.

Table III: Master listing of QML approved plastic encapsulated microcircuits (PEM).

Table IV: Lists catalog product produced on a QML line under certain conditions. (full temperature range only, SMD is not available, but product is eligible given the proper demand)

Table V: Approved Master Die Source Listing by Military Drawing Number and Military Specification

Section II: DMS Section *NEW*

This section will include QML Diminishing Manufacturing Sources (DMS) to be defined in future revisions of MIL-PRF-38535. Parts to be listed in this section will be transferred from the capability section (Section III) of the QML when an order has been placed for the device and the appropriate testing has been completed.

Section III: Capability Section *NEW *

Table I: Plastic Capability (PEM SMD/QML devices)

As a result of the SMD/QML partnership, DSCC and the following device manufacturers have agreed to this table of potential PEM SMD/QML devices to provide you our customer, with the most responsive and useable procurement standardization system available.

The parts numbers listed, although not currently available as QML certified product, are at the stage where they can rapidly be finalized and available for your procurement need on a SMD. Simply choose the part number from this table you wish to use and call Mr. Ray Monnin (614-692-0536) for linear, interface, programmable and memory devices or Mr. Tom Hess (614-692-0547) for high volume CMOS, Bipolar, ASIC and microprocessor devices. You will be given a device class N, SMD part number that day, generally during your call. Both partners have agreed to complete all the remaining processing including the development of the SMD within 5-10 working days. DSCC will e-mail or FAX the final SMD to you, while the device manufacturer will provide you with the SMD/QML product delivery date.

Table II: Ceramic Capability

The purpose of this table is to provide the microcircuit user with the visibility of products, that are capable of being supplied from a certified QML manufacturer. The part numbers listed, although not currently available as QML certified product, are at the stage where they can rapidly be finalized. When an order is placed for a particular product from this section the manufacturer will ensure all that all certification ,qualification and documentation items are complete as required by manufactures DSCC approved quality management plan. The manufacture will also submit to DSCC a certificate of compliance for the applicable slash sheet or Standard Microcircuit Drawing. Upon completion of these requirements the product listing information will be transferred to either section I or section II of the QML listing as a qualified product.

For additional product information or information on product not listed contact the person listed on the manufacturer flow sheet.

Section IV: Distributors List Information

Important Information Concerning User Decision to Procure
Texas Instruments QML Devices in Plastic Packaging Technology

1. The user must carefully research the device end-use applications to determine if plastic packaging is appropriate.
2. Because plastic packages are not hermetic, if product is to be stored for a certain period in uncontrolled conditions, "dry bag" packaging may be required. TI will identify devices that require dry bag packaging. It is the buyer's responsibility to ensure that these conditions are maintained over the storage life of the product.
3. Plastic packages typically do not dissipate heat as well as ceramic or metal packages.
4. The QML packaging technology flow is typically the same as commercial, through assembly, therefore, users cannot require "specials".

These are some of the basic differences between TI's plastic commercial-off-the-shelf (COTS) and plastic QML:

	Commercial-Off-the-Shelf	**QML**
Traceability	Limited	Yes
Burn-In	not unless Commercial performs 1/	not unless Commercial performs 1/
Product Change Notification	Limited	Yes
Availability	varies by device (could be as little as two years)	extended support with opportunity for lifetime buy
Military Temperature Testing	No	Yes
Availability of Qualification and Reliability Data	Limited	Yes
Failure Analysis for Field Failures	Limited	Yes
Extensive Background information in using product in military environments	Limited	Yes
Support for special quality clauses and/or flow-down requirements	No	Yes

For more detailed information the user may contact:

TI	QML Program Manager	(903) 868-6274
DSCC-VQC	Mr. Andy Thacker	(614) 692-0589
Rome Lab	Mr. James Reilly	(315) 330-4055
NASA	Mr. Michael J. Sampson	(301) 286-3335
DSCC-VAC	Mr. Tom Hess	(614) 692-0547

1/ TI's QML plastic product offering follows TI's Best Commercial Practice approach. The Military and Commercial plastic flows are essentially the same with the exception of extended Military temperature testing in accordance with the SMD. Therefore, a QML plastic device will not receive burn-in unless the commercial device also receives burn-in (regardless of test optimization results). Life test is performed during initial qualification and as part of periodic reliability monitors. In addition, some QML plastic lead frames are palladium and burn-in may degrade the solderability.

Notes on ESD Designations

Electrostatic Discharge Sensitivity (ESDS) listing: ESD classification levels, as required by MIL-PRF-38535, will be listed in 5 of the 8 tables in the applicable ESD column. The annotations can be interpreted as follows:

Status	**Interpretation**
Blank	Data not submitted to DSCC
0	Not tested
1	Class 1; 0 - 1999V
2	Class 2; 2000V - 3999V
3	Class 3; >= 4000V
I	Inactive for new design

The number in parenthesis following the ESD classification level 1,2,3 indicates the voltage in thousands at which the device was tested to. For example 2(2.5) means that the device is class 2 and was subjected to and passed at 2.5 kV.

Section I
Notes

1/ This note has been removed.

2/ Package lead counts are listed by the maximum number of leads covered by the qualification. If the manufacturer's package outline drawing is covered by MIL-STD-1835, then the case outline letter will be listed.

3/ The manufacturer has certified that the advanced microcircuits listed were/are being built, tested, and shipped, using the certified/qualified lines/flows, processes, and materials, and as defined by a completed Standardized Military Drawing (SMD) or MIL-M-38510 part number are in full compliance with MIL-PRF-38535.

4/ Caution. Do not use this number for item acquisition. Items acquired to this number are NOT QML devices and may not satisfy the performance, quality, or reliability requirements of the military.

5/ All devices are in the military temperature range -55 to +125?C, unless otherwise specified in the SMD

6/ Devices found in this table meet the qualification requirement of MIL-PRF-38535 but are not covered by a Standardized Microcircuit Drawing (SMD). Please contact Mr. Ray Monnin (614) 692-0536 concerning the possibility of covering these devices with an SMD.

7/ Contact Texas Instruments for plastic package availability for a given device type.

8/ This product is being actively supplied under MIL-PRF-38535 and is considered acceptable for use in new designs.

9/ SMD devices and MIL-M-38510 slash sheet devices which meet the RHA requirements of MIL-PRF-38535 shall be marked with the appropriate RHA designator M, D, P, L, R, F, G, or H replacing the dash "-" in the PIN as indicated in the following examples:

5962 (M, D, P, L, R, F, G, or H) 8999901EA
M38510 (M, D, P, L, R, F, G, or H) 75001B2A

Only the highest RHA level that the device is qualified for shall be listed in this QML; however, at the request of the customer, the manufacturer is authorized to supply any lower RHA level device. Upon request of the customer, the non-RHA PIN designated with a dash (-) may be supplied at the option of the manufacturer. The manufacturer may also opt to submit a certificate of compliance to have the non-RHA PIN listed in addition to the RHA PIN in this QML.

10/ The lead finish indicated in the Section I Table I listing is the most readily available from the manufacturer listed for the part. The manufacturer is authorized to supply other lead finishes than that listed provided that further testing/qualification is performed by the manufacturer on the other lead finish(es). The user needs to contact the manufacturer to determine the availability of other lead finishes not listed herein.

MIL-PRF-38535 QML Program Status
Xilinx Incorporated

Package Information 2/

Type	Lead Range	Matrix Size	Lead Finish	Lead Pitch
BGA		225-560	solder	1.27, 1.5 mil
DIP	8		solder	100 mil
Flatpack	100-228		gold	25 mil
Leadless Chip Carrier	28-84		solder	50 mil
PGA		68-559	gold	100 mil

Section I
Table I
Approved Master Source Listing by Military Drawing Number and Military Specification

This section provides manufacturers that meet all MIL-PRF-38535 requirements. All products listed in this section have been qualified under the requirements of the latest effective issue of MIL-PRF-38535 and the applicable military acquisition document. Additionally, manufacturers meeting requirements for transitional certification are listed in this section. These manufacturers are authorized to use the military identifier and the "QML" or "Q" certification mark on each microcircuit produced under the certified QML envelope of processes and materials as specified herein. Manufacturers listed in this section can also use the Military Specification (MIL-M-38510) identifier and the "JAN" or "J" certification mark to satisfy customer orders for JAN QPL devices previously produced under MIL-M-38510.

Section I
Table II
Approved Master Source Listing by Manufacturer's Generic Part Number

This section provides manufacturers that meet all MIL-PRF-38535 requirements. All products listed in this section have been qualified under the requirements of the latest effective issue of MIL-PRF-38535 and the applicable military acquisition document. Additionally, manufacturers meeting requirements for transitional certification are listed in this section. These manufacturers are authorized to use the military identifier and the "QML" or "Q" certification mark on each microcircuit produced under the certified QML envelope of processes and materials as specified herein. Manufacturers listed in this section can also use the Military Specification (MIL-M-38510) identifier and the "JAN" or "J" certification mark to satisfy customer orders for JAN QPL devices previously produced under MIL-M-38510.

Section I
Table III
Approved Master Source Listing by Military Drawing Number and Military Specification
for Plastic Encapsulated Microcircuits

This section provides manufacturers that meet all MIL-PRF-38535 requirements. All products listed in this table have been qualified under the requirements of the latest effective issue of MIL-PRF-38535 and the applicable military acquisition document. These manufacturers are authorized to use the military identifier and the "QML" or "Q" certification mark on each microcircuit produced under the certified QML envelope of processes and materials as specified herein.

Table IV
Available Listing of Catalog Standard Product

Certain manufacturer's data book/catalog military temperature range devices may be available as QML product and marked with a "QML" or "Q" certification mark, provided they are produced on a certified QML flow. These devices must be released prior to 1 June 1993 and the part numbers must be submitted to the qualifying activity for approval. For more detailed information please contact the following:

Analog Devices, Mr. Al McEvoy, (781) 937-2673
Atmel-Nantes, Ms. Monique Leseur, (332)401 81873
Intersil, Ms. Jean Seib, (321) 724-7034
National, Ms. Winnie Alvarez, (408) 721-6246
Rochester, Mr. Joe Graziano, (978) 462-9332
T.I., Mr. Steve Miller, (903) 868-6274

See information in the front of this document on plastic packages.

Table V
Approved Master Die Source Listing by Military Drawing Number and Military Specification

The product listed below can be procured in die form from the manufacturer listed below. Criteria concerning the QML parameters, die backing, etc. are contained within the Standardized Microcircuit Drawing (SMD). For more information contact Mr. Mike Adams, (614) 692-0662, or Mr. Ray Monnin, (614) 692-0536.

Section II
Table I
Diminishing Manufacturing Sources (DMS)

The devices in this section meet the alternate die evaluation criteria of MIL-PRF-38535 Paragraph 3.6.3 and A 3.2.2 or as specified in the QM plan. The parts are marked with the "QD" certification mark in lieu of the "Q" or "QML" mark. For specific information concerning criteria that qualified the product as 'QD", contact the manufacturer below.

Section III
Table I
Plastic Capability (PEM SMD/QML Devices)

As a result of the SMD/QML partnership, DSCC and the following device manufacturers have agreed to this table of potential PEM SMD/QML devices to provide you, our customer, with the most responsive and useable procurement standardization system available.

The part numbers listed, although not currently available as QML certified product, are at the stage where they can rapidly be finalized and available for your procurement need on a SMD. Simply choose the part number from this table you wish to use and call Mr. Ray Monnin, (614) 692-0536, for linear, interface, programmable, and memory devices or Mr. Tom Hess, (614) 692-0547, for high-volume CMOS, bipolar, ASIC, and microprocessor devices. You will be given a device class N, SMD part number that day, generally during your call. Both partners have agreed to complete all the remaining processing including the development of the SMD within 5-10 working days. DSCC will e-mail or fax the final SMD to you, while the device manufacturer will provide you with the SMD/QML product delivery date.

UC3635N	Phase Locked Frequency Controller	Unitrode
UC3637N	Switched Mode Controller for DC Motor Drive	Unitrode
UC3638N	Advanced PWM DC Motor Controller	Unitrode
UC3646N	Sensorless BDC Motor	Unitrode
UC3702N	Quad PWM Relay Driver	Unitrode
UC3704N	Bridge Transducer Switch	Unitrode
UC3705N	High Speed Power Driver	Unitrode
UC3706N	Dual Output Driver	Unitrode
UC3707N	Dual Channel Power Driver	Unitrode
UC3708N	Dual Non-Inverting Power Driver	Unitrode
UC3708NE	Dual Non-Inverting Power Driver	Unitrode
UC3709N	Dual High Speed FET Driver	Unitrode
UC3710N	High Current FET Driver	Unitrode
UC3711N	Dual Ultra High-Speed FET Driver	Unitrode
UC3711NE	Dual Ultra High-Speed FET Driver	Unitrode
UC3714N	Complementary Switch FET Driver	Unitrode
UC3715N	Complementary Switch FET Driver	Unitrode
UC3717N	Stepper Motor Drive Circuit	Unitrode
UC3724N	Isolated Drive Transmitter	Unitrode
UC3725N	Isolated High Side FET Driver	Unitrode
UC3726N	Isolated Drive Transmitter	Unitrode
UC3727N	Isolated High Side IGBT Driver	Unitrode
UC3730N	Thermal Monitor	Unitrode
UC3770AN	High Performance Stepper Motor Drive Circuit	Unitrode
UC3770BN	High Performance Stepper Motor Drive Circuit	Unitrode
UC3823AN	High Speed PWM Controller	Unitrode
UC3823BN	High Speed PWM Controller	Unitrode
UC3823N	High Speed PWM Controller	Unitrode
UC3824N	High Speed PWM Controller	Unitrode
UC3825AN	High Speed PWM Controller	Unitrode
UC3825BN	High Speed PWM Controller	Unitrode
UC3825N	High Speed PWM Controller	Unitrode
UC3826N	Secondary Side Average Current Mode Controller	Unitrode
UC3832N	Precision Low Dropout Linear Controller	Unitrode
UC3834N	High Efficiency Linear Regulator	Unitrode
UC3835N	High Efficiency Regulator Controller	Unitrode
UC3836N	High Efficiency Regulator Controller	Unitrode
UC3838AN	Magnetic Amplifier Controller	Unitrode
UC3840N	PWM Controller	Unitrode
UC3841N	Programmable, Off-Line, PWM Controller	Unitrode
UC3842AN	Current Mode PWM Controller	Unitrode
UC3842N	Current Mode PWM Controller	Unitrode
UC3843AN	Current Mode PWM Controller	Unitrode
UC3843N	Current Mode PWM Controller	Unitrode
UC3844AN	Current Mode PWM Controller	Unitrode
UC3844N	Current Mode PWM Controller	Unitrode
UC3845AN	Current Mode PWM Controller	Unitrode
UC3845N	Current Mode PWM Controller	Unitrode
UC3846N	Current Mode PWM Controller	Unitrode
UC3847N	Current Mode PWM Controller	Unitrode
UC3848N	Average Current Mode PWM Controller	Unitrode
UC3849N	Secondary Side Average Current Mode Controller	Unitrode
UC3851N	Programmable, Off-Line, PWM Controller	Unitrode
UC3852N	High Power Factor Preregulator	Unitrode
UC3853N	High Power Factor Preregulator	Unitrode
UC3854BN	Enhanced High Power Factor Preregulator	Unitrode
UC3854N	High Power Factor Preregulator	Unitrode
UC3855AN	High Performance Power Factor Preregulator	Unitrode
UC3855BN	High Performance Power Factor Preregulator	Unitrode
UC3856N	Improved Current Mode PWM Controller	Unitrode
UC3860N	Resonant Mode Power Supply Controller	Unitrode

16-Oct-02

Manufacturer Part Number	Product Description	Source(s)
UC3861N	Resonant Mode Power Supply Controller	Unitrode
UC3862N	Resonant Mode Power Supply Controller	Unitrode
UC3863N	Resonant Mode Power Supply Controller	Unitrode
UC3864N	Resonant Mode Power Supply Controller	Unitrode
UC3865N	Resonant Mode Power Supply Controller	Unitrode
UC3866N	Resonant Mode Power Supply Controller	Unitrode
UC3867N	Resonant Mode Power Supply Controller	Unitrode
UC3868N	Resonant Mode Power Supply Controller	Unitrode
UC3871N	Resonant Fluorescent Lamp Driver	Unitrode
UC3872N	Resonant Lamp Ballast Controller	Unitrode
UC3874N-1	High Efficiency, Synchronous, Step-Down (Buck) Controller	Unitrode
UC3874N-2	High Efficiency, Synchronous, Step-Down (Buck) Controller	Unitrode
UC3875N	Phase Shift Resonant Controller	Unitrode
UC3876N	Phase Shift Resonant Controller	Unitrode
UC3877N	Phase Shift Resonant Controller	Unitrode
UC3878N	Phase Shift Resonant Controller	Unitrode
UC3879N	Phase Shift Resonant Controller	Unitrode
UC3886N	Average Current Mode PWM Controller IC	Unitrode
UC3901N	Isolated Feedback Generator	Unitrode
UC3903N	Quad Supply and Line Monitor	Unitrode
UC3904N	Precision Quad Supply and Line Monitor	Unitrode
UC3906N	Sealed Lead-Acid Battery Charger	Unitrode
UC3907N	Load Share Controller	Unitrode
UC3909N	Switchmode Lead-Acid Battery Charger	Unitrode
UC3910N	4-bit DAC and Voltage Monitor	Unitrode
UC39431BN	Precision Adjustable Shunt Regulator	Unitrode
UC39431N	Precision Adjustable Shunt Regulator	Unitrode
UC39432BN	Precision Analog Controller	Unitrode
UC39432N	Precision Analog Controller	Unitrode
UC494ACN	Advanced Regulating Pulse Width Modulator	Unitrode
UC494AN	Advanced Regulating Pulse Width Modulator	Unitrode
UC494CN	Advanced Regulating Pulse Width Modulator	Unitrode
UC495ACN	Advanced Regulating Pulse Width Modulator	Unitrode
UC495BCN	Advanced Regulating Pulse Width Modulator	Unitrode
UC495BN	Advanced Regulating Pulse Width Modulator	Unitrode
UC495CN	Advanced Regulating Pulse Width Modulator	Unitrode
UC5170CN	Octal Line Driver	Unitrode
UC5171N	Octal Line Driver	Unitrode
UC5172N	Octal Line Driver	Unitrode
UC5180CN	Octal Line Receiver	Unitrode
UC5181CN	Octal Line Receiver	Unitrode
UC5601N	SCSI Active Terminator	Unitrode
UC5602N	SCSI Active Terminator	Unitrode
UC5603N	9-Line SCSI Active Terminator	Unitrode
UC5604N	9-Line Low Capacitance SCSI Active Terminator	Unitrode
UC5605N	9-Line Low Capacitance SCSI Active Terminator	Unitrode
UC5607N	Plug and Play, 18-Line SCSI Active Terminator	Unitrode
UC5608N	18-Line Low Capacitance SCSI Active Terminator	Unitrode
UC5609N	18-Line Low Capacitance SCSI Active Terminator	Unitrode
UC5612N	9-Line Low Capacitance SCSI Active Terminator	Unitrode
UC5613N	9-Line Low Capacitance SCSI Active Terminator	Unitrode
UC5661N	Ethernet Coaxial Impedance Monitor	Unitrode
UCC2305N	HID Lamp Controller	Unitrode
UCC2570N	Low Power BiCMOS PWM	Unitrode
UCC2581N	Micropower Voltage Mode PWM	Unitrode
UCC2800N	Low Power BiCMOS Current Mode PWM	Unitrode
UCC2801N	Low Power BiCMOS Current Mode PWM	Unitrode
UCC2802N	Low Power BiCMOS Current Mode PWM	Unitrode
UCC2803N	Low Power BiCMOS Current Mode PWM	Unitrode
UCC2804N	Low Power BiCMOS Current Mode PWM	Unitrode
UCC2805N	Low Power BiCMOS Current Mode PWM	Unitrode
UCC2806N	Low Power, Dual Output, BiCMOS Current Mode PWM	Unitrode

16-Oct-02

Manufacturer Part Number	Product Description	Source(s)
UCC2883N	Micropower Peak Current Mode Controller	Unitrode
UCC2885N	Micropower Secondary Regulation IC	Unitrode
UCC2888N	Off-Line Power Supply Controller	Unitrode
UCC2889N	Off-Line Power Supply Controller	Unitrode
UCC2890N	Off-line Battery Charger Circuit	Unitrode
UCC3803N	Low Power BiCMOS Current Mode PWM	Unitrode
UCC3804N	Low Power BiCMOS Current Mode PWM	Unitrode
UCC3805N	Low Power BiCMOS Current Mode PWM	Unitrode
UCC3806N	Low Power, Dual Output, BiCMOS Current Mode PWM	Unitrode
UCC3807N-1	Programmable Maximum Duty Cycle BiCMOS PWM Controller	Unitrode
UCC3807N-2	Programmable Maximum Duty Cycle BiCMOS PWM Controller	Unitrode
UCC3807N-3	Programmable Maximum Duty Cycle BiCMOS PWM Controller	Unitrode
UCC3810N	Low Power BiCMOS Dual Current Mode PWM	Unitrode
UCC3813N-0	Low Power Economy BiCMOS Current Mode PWM	Unitrode
UCC3813N-1	Low Power Economy BiCMOS Current Mode PWM	Unitrode
UCC3813N-2	Low Power Economy BiCMOS Current Mode PWM	Unitrode
UCC3813N-3	Low Power Economy BiCMOS Current Mode PWM	Unitrode
UCC3813N-4	Low Power Economy BiCMOS Current Mode PWM	Unitrode
UCC3813N-5	Low Power Economy BiCMOS Current Mode PWM	Unitrode
UCC3883N	Micropower Peak Current Mode Controller	Unitrode
UCC3885N	Micropower Secondary Regulation IC	Unitrode
UCC3888N	Off-Line Power Supply Controller	Unitrode
UCC3889N	Off-Line Power Supply Controller	Unitrode
UCC3890N	Off-line Battery Charger Circuit	Unitrode
UCC3912N	Programmable Electronic Circuit Breaker	Unitrode
UCC3913N	Circuit Breaker for	Unitrode
UCC3916N	Circuit Breaker for	Unitrode
UCC5340N	IrDA Receiver	Unitrode
UCC5606N	9-Line 3.5 Volt SCSI Active Terminator, Reverse Disconnect	Unitrode
UCC5610N	18-Line 3.5 Volt Low Capacitance SCSI Active Terminator	Unitrode
UCC5611N	18-Line 3.5 Volt Low Capacitance SCSI Active Terminator, Reverse Disconnect	Unitrode
UCC5614N	9-Line 3.5 Volt SCSI Active Terminator	Unitrode
UCC5617N	18-Line SCSI Terminator, Reverse Disconnect	Unitrode
UCC5618N	18-Line SCSI Terminator	Unitrode
UCC5950N	D/A Converter	Unitrode

Section III
Table II
Ceramic Capability

The purpose of this table is to provide the microcircuit user with the visibility of products that are capable of being supplied from a certified QML manufacturer. The part numbers listed, although not currently available as QML certified product, are at the stage where they can rapidly be finalized. When an order is placed for a particular product from this section the manufacturer will ensure that all certification, qualification, and documentation items are complete as required by the manufacturer's DSCC-approved quality management plan. The manufacturer will also submit to DSCC a certificate of compliance for the applicable slash sheet or Standard Microcircuit Drawing. Upon completion of these requirements, the product listing information will be transferred to either Section I or Section II (DMS) of the QML listing as a qualified product.

For additional product information or information on product not listed contact the person listed on the manufacturer flow sheet.

Section IV
Table I
QML Manufacturer Military Distributors

This section contains a list of QML manufacturers' military distributors. This information was supplied by the QML manufacturers and is provided in QML-38535 as a service from DSCC-VQC. This listing is provided as a service only and is in no way intended to be an endorsement or restriction by the Government. For additional information or further update contact the applicable manufacturer in the QML Program Status section.

Cypress Semiconductor

Arrow Zeus Electronics
2900 Westchester Av.
Purchase, NY 10577
914 701 7400
FAX: 914 701 4701

Bell Microproducts
1941 Ringwood Avenue
San Jose, CA 95131

Future Electronics
237 Hymus Boulevard
Point Claire, Quebec H9R 5C7 Canada
514 694 7710
FAX: 514 695 3707

Rochester Electronics
10 Malcolm Hoyt Drive
Newburyport, MA 01950-4018
978 462 9332
FAX: 978 462 9512

Unique Technologies
9980 Huennekens Street
San Diego, CA 92121
619 450 8700
FAX: 619 450 8750

Intersil, Corp

Alliance Electronics Inc.
7550 East Redfield Rd
Scottsdale, AZ 85260-3404
602 483 9400

Arrow/Schweber Electronics Group
25 Hub Drive
Melville, NY 11747-3509
516 391 1300

Hamilton/Hallmark
10950 West Washington Boulevard
Culver City, CA 90230-4000
310 558 2000

Zeus Electronics
100 Midland Avenue
Port Chester, NY 10573-4993
914 937 7400

Linear Technology

Arrow Zeus Electronics
2900 Westchester Av.
Purchase, NY 10577

Microsemi Integrated Products

ACI Electronics Corporation
200 Newtown Road
Plainview, NY 11803-4381
