

5011 Compliant Materials

1. The information listed below is not intended to and does not connote endorsement of the manufacturer/supplier or their product and/or service by the U.S. Government.
2. As a result of the Commercial Laboratory Suitability program administered by DLA Land and Maritime-VQ, the following information has been provided by the following suppliers.
3. The suppliers listed below have stated that the adhesive materials listed under their company's name have meet the supplier's testing requirements of Test Method 5011 of MIL-STD-883.
4. Test Method 5011 of MIL-STD-883 requires the user to perform certification and acceptance testing on each adhesive.
5. The user must carefully research the adhesive to determine if the adhesive will work in the application (processes and materials).
